About us

MicroNet Broadband is located in Surrey, United Kingdom & offers its satellite internet services to a network of worldwide resellers & Also direct to end users. MicroNet has been supplying satellite broadband services worldwide since 2003

Get Broadband Anywhere! - Introducing the next generation iDirect EVOLUTION DVB-S2 Platform

iDirect's Evolution product line can deliver a 30 percent improvement in bandwidth efficiency over DVB-S1 systems. You can gain up to 50 percent more through Adaptive Coding and Modulation (ACM), an advanced feature of the DVB-S2 standard.

Once in place, Evolution is supported by an entirely new approach to delivering platform features. Enhancements and updates to the Evolution product suite can be implemented instantly with over-the-air software upgrades.

iDirect Evolution: the perfect combination of powerful, leading innovations working together to give you a competitive edge in a very challenging industry.
